

# Labelling Solutions

## Thermal TRANSFER & INKJET PRINTERS

### About Easyprint Australia

Easyprint Australia has been providing clever marking and labelling solutions to the Australian packaging industry since 2000. We are the Australian agent for Scandinavian designed and produced *Easyprint* thermal transfer printers, and *HM labellers*. We are also the agents for *Kortho* and for *Jetmaster* inkjet printers, designed in Holland and Japan respectively.

Our products are used in packaging where marking or labelling is required in-line. Our products are clever because they combine latest technology and high performance with simplicity of design and easy use. They are also cost effective.

The Easyprinters use thermal transfer technology and are fast, accurate and some have a patented ribbon saving device. The HM labellers include the first 'liner-free' labeller in the industry – also a patented feature.

Kortho, with ink-jet printers, hot-stampers and hot-foil coders enable the high resolution coding and marking on porous and non-porous surfaces.

The Jetmaster drop-on-demand technology based large-character ink-jet printer, offers high-performance and cost-effective solutions for marking on cardboards and paper bags.

Our installations are many and varied; from dairy products, small goods, fresh foods, drinks, confectionary and pharmaceutical products. Our customers range from multinationals to very small businesses.

*Some of our customers include:*

- Primo
- Unomedical
- Pasta di Casa
- McCormick's Foods
- Dorsogna
- Dairy Farmers
- KR Castlemaine
- Cadburys
- Miss Maud
- Amcor

### Our service program

*We understand a good product doesn't stand alone. Our printers and labellers are backed by training and servicing support here in Australia, as well as comprehensive research and development programmes with our manufacturers.*

#### Pre-Sale Service

- Samples of print on your material (contact us)
- Pre-installation site/technical advice

#### Installation and Training Services

- Technical installation
- Training, with support and coaching for up to 4 weeks post installation

#### After Sales Service

- Technical hotline
- Maintenance service agreement
- Supply of consumables

#### Easyprint News

- Easyprint Australia Newsletter is available quarterly or as fresh news becomes available through our website [www.easy-print.com.au](http://www.easy-print.com.au)

## Why our products are clever

At Easyprint Australia we take care to ensure that our suppliers are well established. They must be known for innovative, yet practical design as well as technical expertise. All our suppliers have supportive ongoing research programmes. Below is a brief summary of some of the products in our range. If you don't see something here to suit your needs we may still be able to help you with another product, or even a custom made solution tailored to your requirements. Contact us!

### Thermal Transfer Printers

- Comprehensive range of high speed Easyprint thermal printers for intermittent and continuous packaging machineries, multiple line applications (TM printers)
- Printing resolution 300dpi
- Print speed from 50 – 1400mm/sec
- Graphical logos and barcode printing
- Ribbon saving feature in certain type (CM printers, Communicator)

### In-line Label Applicators

- HM Label applicators for small jobs as well as for round the clock operations
- High capacity, up to 60m/min
- Print module options
- Top and bottom, all-around labelling

### Print And Apply System – Linerfree

- HM Prints and applies self adhesive paper without a liner
- Print speed up to: 200mm/sec
- Dispensing speed up to 25m/min (optional 50m/min )
- 60% more paper on the same diameter
- No paper waste

### Cross Web Label Applicator

- HM 4000 CW is designed to optimise labeling in deep draw machine for vacuum packaging
- Used for labeling on the top or under the foil
- Film width up to 950mm
- Dispensing speed up to 57m/min
- Built with Vacuum chamber applicator
- Print Module (HM Promax) or thermal transfer printing options

### Ink-Jet Printer – (Piezo-technology based)

- Kortho Graphicjets for porous and non porous surfaces (PE, PET, laminated films, alu-foil, paper, glass, cardboard, wood)
- Max printing speed: 35m/min
- Print height: up to 35mm-12 lines
- 12 pre-stored images, logos, commonly used barcodes,

### Ink-Jet Printer – (Drop-on-Demand)

- Jetmaster: high resolution ink jet printing on porous surfaces (cardboards, paper bags)
- 300dpi resolution
- Running with HP (Hewlett-Packard) disposable ink
- Maintenance free
- Printing speed up to 60 meters/min
- Print head control capability (2 print heads)
- Barcode and logo printing (optional)

### Hot Quick Coders

- Kortho Hot Quickcoder can be used on almost any material and surface.
- Up to three lines of text in a maximum printing area of 12 x 24 mm
- Built with a unique spring loaded printhead, which allows you to make perfect print on moving products
- Variable colours printing

### Hot Stamp Coders

- Kortho Hot-Coders enable to print variable data directly on packaging film during the production process, also on paper, cardboard, plastic, rubber
- Low maintenance cost, flexibility
- Maximum print area: 100x150mm
- Maximum printing speed: up to 180 print/min
- Variable colours printing
