

No Maintenance with HP high-resolution ink-jet printer?? Find out how....

No maintenance with an ink-jet printer? Sounds like an oxymoron, doesn't it? It's possible with the new ULTIJET from Easyprint Australia from now on.

What is an ULTIJET? An ULTIJET is a superior ink-jet printer that prints on all products (well, OK, a good percentage of products) with excellent high resolution marks (300 dpi) produced from a disposable HP® cartridge with no mess, no fuss, and virtually no downtime or maintenance.

Who are the customers? Anyone who needs to code a product, packaging or mark a carton, cardboard box. Porous or non-porous, the substrate is no longer an issue with the ULTIJET ink-jet printer.

MSSC(Marsh Shipping Supply Co.) wants to share this new coding experience with you.....we want you to *Feel the Rush!*

Facts about the Ultijet high-res ink-jet printer:

- An Ultijet can print up to 4 production lines with only one printer.
 - At different line speeds
 - With different ink types (porous or non-porous) and different colors
